**Doran Adds New Mobile Dealer to Enhance Service to the RV Community**

Cincinnati, Ohio – After a somewhat lengthy search and selection process, Doran has reached an agreement with Chip Aiken (owner at Great RV Products) to represent and sell the Doran 360RV™ tire pressure monitoring systems product lines to the RV community.

“First and foremost, it was a priority for us to find a mobile dealer that shares the same core values of honesty and integrity that we do at Doran.” says Doran’s General Manager, Jim Samocki. “Chip has a wonderful reputation in the industry and is known for his technical expertise with a number of RV products. He is just finishing up his term as the President of the American Coach Chapter of the FMCA and is the Policy Chairman for the American Coach Association. We are fortunate to have him as a member of the team and that he decided to represent Doran’s product line as a cornerstone of his new business venture.”

“I understand the importance of monitoring tire pressures and I was an early adopter of TPMS technology and bought my first system from Doran in 2005. I upgraded to the Doran 360RV™ system in 2009 and have always been impressed with the quality of their products and how well they treat their customers.” said Chip Aiken. “My wife and I are now in our sixth year as full-time RVers and we are looking forward to becoming an additional source for products and information that can be presented based on their own merits and advantages.”

Mr. Aiken continued, “I looked at a number of options and did my due diligence before selecting a vendor to launch my business with and it quickly became apparent that Doran was an excellent fit. They have a solid in house team that handles customer service, engineering, quality control and product development and every person is focused on providing the best overall value to the customer. The Doran 360RV’s patent pending ‘FastLeak™’ alarm is a must-have feature for an RVer and they also have a high temperature alarm along with best warranty in the market.”

The Doran 360RV™ is ideal for RVs of all sizes and configurations, including fifth-wheels. Installation can be accomplished without any special tools in less than an hour. A simple to understand and operate digital LCD screen display comes equipped with 4-way navigational buttons. The high-impact nylon, valve-stem mounted sensors, with potting material inside, have passed rigorous SAE tests by an independent a2La accredited testing facility to ensure that they deliver the longest life and corrosion resistance on the market. Multiple mounting options including an adjustable pedestal mounting kit, visor clips and/or hook & loop fastening tape that allows the LCD screen to be mounted virtually anywhere.

About Doran Manufacturing, LLC:

Cincinnati-based Doran Manufacturing has been supplying high quality transportation safety for over 35 years. In addition to tire pressure monitoring systems, the company supplies LED and incandescent Exterior Light Monitors, Sleeping Child Checks®, Emergency Exit Monitors and a full range of LED lighting products to the school bus market. Also, the company continues to manufacture electric terminals and terminal boards for in the original factory that was established in 1954.
